Heathcote High School

BRING YOUR OWN DEVICE

Important News!

Parent invitation

When: Tuesday 9th December, 3.30 pm

Where: Heathcote High School, TLS (next to the library)

What's it about? From the beginning of first term, 2015, Heathcote High School will allow all students to use privately owned electronic devices to access the NSW DEC wireless network on filtered internet. Use of the privately owned devices is to support and promote the educational objectives of Heathcote High School.

The devices students can bring to school should be selected from the device specifications as outlined on the Heathcote High School website where more information about the program can also be found.

Presenter: Laurens Derks is a member of the Dell Future Learning project. This project is the result of a collaborative effort between the NSW Department of Education and Communities, Dell Australia and Intel, to support the ongoing delivery of quality teaching practice in public education.

Having gained leadership experience in the DER program, Laurens brings to the team a conviction that technology provides new opportunities to reimagine learning for our students. His experience in both primary and secondary classrooms give him a clear understanding of the dynamic nature of schools.

Come along and hear what Laurens has to say about BYOD.
